

Nattokinase

(NSK-SD™)

First To Introduce

Allergy Research Group made a pioneering introduction of nattokinase (NSK-SD™)

First In Quality

All nattokinase is not created equal: ARG has tested recent entries into this market and few meet Dr. Holsworth and Dr. Sumi's (discoverer of nattokinase) standards.

ARG offers only the patented NSK-SD™ nattokinase with no vitamin K, which is the only form that has been tested for safety. Each batch is tested to ensure potency.

A Note from Dr. Ralph Holsworth

"As the leading researcher of nattokinase in the U.S. and as a clinician, I am greatly concerned that the nattokinase available in the marketplace is safe and effective. For this reason, I have supported the proper development of NSK-SD™ nattokinase and carefully studied the safety and efficacy data, which consistently has the highest nattokinase activity available (>20,000 FU/g), the highest levels of safety testing, and the largest human clinical trials to date. I am confident in saying that NSK-SD™ is the gold standard for nattokinase on the market today."

- Dr. Ralph E. Holsworth, Jr., D.O. - Leading Nattokinase Researcher
