**Nattokinase, 100 mg**  
**Bio GF & Bio GF Pro Spray**

## 5 GREAT ANTI-AGING PRODUCTS FROM ARG!

### **OcuDyne II**

#### **Comprehensive Eye Support**

The aging process can lead to several degenerative conditions of the eye such as cataracts, macular degeneration, dry eye, and eye floaters, so it makes good sense to supplement the diet with nutrients that support eye health. Originally formulated, and later updated by leading authorities in the field of nutritional medicine, Dr. Alan Gaby, M.D. and Dr. Jonathan Wright, M.D., OcuDyne II was the first full spectrum eye support formula. Together with the vitamins, antioxidants, key amino acids, minerals, bioflavonoids such as quercetin, lutein and zeaxanthin, and extracts of ginkgo and bilberry, these nutrients offer superior support for the structural integrity and function of the

eye.\* In 2005, OcuDyne II was further improved upon with the addition of natural vitamin E mixed tocopherols (high in gamma-tocopherol and tocotrienols), vitamin D, alpha-lipoic acid and lycopene. In particular, lutein is a powerful antioxidant known to be deposited especially in the lens and the macular region of the retina, the area responsible for central vision.\* OcuDyne II may also be used as a multivitamin/multimineral formula.

### **SynovoDerma**

#### **Nature's Hydrating Agent**

As the skin ages, it loses its plump, hydrated appearance. SynovoDerma contains Hyaluronic Acid (HA), a glycosaminoglycan and proteoglycan that is found in every tissue of the

body, but is especially high in the skin. HA's primary role in the body is cellular hydration, however, HA diminishes with age. HA supplementation hydrates the cells and adds back that plump hydrated look of youthful skin. SynovoDerma is prepared using a unique, patented enzymatic process to ensure low molecular weight, thereby enhancing absorption.

## Nattokinase, 100 mg

### Healthy Blood Viscosity Support

While maintaining healthy blood viscosity is dependent on a number of factors, including diet, lifestyle and genetics, the risk of developing a blood clot that could result in a heart attack or stroke rises considerably with age. Nattokinase is a unique dietary supplement derived from a traditional Japanese food called "natto" that has been used for over 1000 years for cardiovascular health. Nattokinase is a powerful fibrinolytic enzyme that has been shown to support healthy blood viscosity within normal levels.\* The preferred dosage recommended by the discoverer of nattokinase, Dr. Hiroyuki Sumi, is 4000 to 8000 FU's per day (100 to 200 mg twice per day). Allergy Research Group offers only NSK-SD™ nattokinase, the industry "gold standard", which is the only US-patented manufacturing process that removes all vitamin K, thus preventing any adverse interaction with warfarin (Coumadin), or other vitamin K antagonists. Nattokinase is a must-have supplement for the aging body.

#### Pricing:

Name	Item#	Quantity	MSRP
OcuDyne II	71080	200 caps	\$39.30
SynovoDerma	74740	150 softgels	\$62.50

## Osteo-Vi-Min

### Comprehensive Bone Support

Age-related bone loss is one of the most prevalent health conditions among the elderly. It is well known that bone density can be supported through diet and lifestyle. A calcium-rich diet and regular weight-bearing exercise are essential. But getting enough calcium through diet alone can be difficult. Osteo-Vi-Min is ARG's cutting edge bone support formula that helps put calcium where it belongs! Osteo-Vi-Min not only contains all the calcium needed for healthy bones, but it also contains cutting-edge nutrients that enhance calcium absorption and utilization featuring Vitamin K2, Vitamin D3, Boron and Strontium, to name a few. And no more popping 20 capsules a day to get enough calcium, Osteo-Vi-Min comes in a convenient powder so you can mix it with your favorite beverage. Osteo-Vi-Min is also available in convenient chewable tablets.

## Bio GF & Bio GF Pro Spray

### Growth Hormone Support

Growth hormone is naturally released by the pituitary gland in response to sleep and exercise to replenish the tissues of the body. Age-related decline in growth hormone levels can be responsible for reduced muscle mass, loss of muscle strength, reduced bone density and low energy levels. Bio GF & Bio GF Pro Spray are unique dietary supplements that support the body in producing growth hormone.\* Bio GF & Bio GF Pro Spray contain small and medium molecular weight peptides complexed to MMC-2000™, a natural transporter molecule.

This is an advanced delivery system only available in Bio GF & Bio GF Pro Spray, offering superior absorption.\*
