*OcuDyne II has long been the superior choice for eye support, but now with added alpha-lipoic acid, lycopene, mixed tocopherols, and tocotrienol complex, it's even more comprehensive than before!*

Developed by Jonathan Wright, M.D. & Alan Gaby, M.D. (Leading authorities in nutritional medicine)

## OCUDYNE II

**NEW AND IMPROVED 2005 FORMULA!**

The OcuDyne formulas were originally formulated for NutriCology® by Jonathan Wright, M.D. and Alan Gaby, M.D. OcuDyne II New & Improved 2005 Formula adds natural vitamin E mixed tocopherols high in gamma-tocopherol and tocotrienols, vitamin D, alpha-lipoic acid and lycopene to the formula. Together with the vitamins, antioxidants, key amino acids, minerals, bioflavonoids such as quercetin, lutein and zeaxanthin, and extracts of

ginkgo and bilberry, these nutrients offer superior support for the structural integrity and function of the eye.\* In particular, lutein is a powerful antioxidant known to be deposited especially in the lens and the macular region of the retina, the area responsible for central vision.\* This new, expanded formula may be used as a multivitamin/multimineral formula as well.
